

## Project Synopsis/Project Concept Document (Due: 18<sup>th</sup> August)

*Remove the descriptive paragraphs in each section including this line (given in blue) stating what to do before you add this to your repository or turn it in.*

Project number	<i>SSAD 01</i>
Project Title	<i>PLUGIN DEVELOPMENT FOR ROBUSTEST</i>
Document	SSAD Project Concept Document
Creation date	<i>20-8-2016</i>
Created By	<i>Saisriragh,krishna vinay,srikar</i>
Client	<i>Aishwarya Mishra ,robustest</i>

### **Description**

Robustest is a mobile app testing website. It basically tests for the bugs in the various mobile apps such as Flipkart, Airtel Money. The project is about designing a plugin to famous applications such as android studio, eclipse to make the mobile app testing easy and convenient.

### **Profile of Users**

*Replace this text and the instructions below with your statement in black.*

The end users are basically the developers developing apps by using various IDEs such as android studio, eclipse and people employed for testing. The users just upload their apps and check the functioning of features on mobile phones.

### **Usage Model and Diagrams (if any)**

# Android Studio

Plugin

When clicks  
Authentication

User name  
Pass Word

If not correct

Error

If the credentials provided are  
correct

UI having options about  
1. mobile model to test on  
2. Test cases  
3. App details

Output

Results of test cases  
Screen Shots and  
Graphs showing Consumption  
of Resources
